BOOKS

Whether your interest is amateur,

shortwave or collecting; Universal

has the very best selection of radio books and study materials.

"One person can effortlessly raise the antenna at night when no one can spot it, and take it down before daybreak. This antenna is also a great choice for portable operations, such as quick and easy mini-DXpedition to a campground or a nice tropical island! In short, the Comet CHA-250B is simple to assemble, painless to elevate and is easy on the eyes, while at the same time getting you on 6 meters thru 80 meters without the requirement of an antenna tuner and ground radials. You'll even be able to work some DX while you're at it!" – Dan Dankert N6PEQ

A picture is worth a thousand words...

With the

# 

wire antenna analysis program for Windows® you get true 3D far field patterns that are far more informative than conventional 2D patterns or wire-frame pseudo-3D patterns.

Now you can have all the advantages of the MININEC code and Sommerfeld-Norton ground too, down to 0.02 wavelengths above ground. No split load, split source, or equivalent monotaper element approximations are needed. Enjoy superior graphing and 2D far field plot comparison capability.

Describe the antenna to the program in an easy-to-use spreadsheet-style format, and then with one mouse-click the program shows you the antenna pattern, front to back ratio, front to rear ratio, input impedance, efficiency, SWR, and more.

An optional **Symbols** window with formula evaluation capability can do your calculations for you. A **Match Wizard** designs Gamma, T, or Hairpin matches for Yagi antennas. A **Clamp Wizard** calculates the equivalent diameter of Yagi element clamps. **Yagi Optimization** finds Yagi dimensions that satisfy performance objectives you specify. Major antenna properties can be graphed as a function of frequency.

There is **no built-in segment limit**. Your models can be as large and complicated as your system permits.

**ANTENNA MODEL** is only \$90. This includes a Web site download **and** a permanent backup copy on CD-ROM. Visit our Web site for more information about **ANTENNA MODEL**.
